

SCANNY3D[®]

3D laser scanning systems

...your future!

Our technology...

WWW.SCANNY3D.COM

THE COMPANY

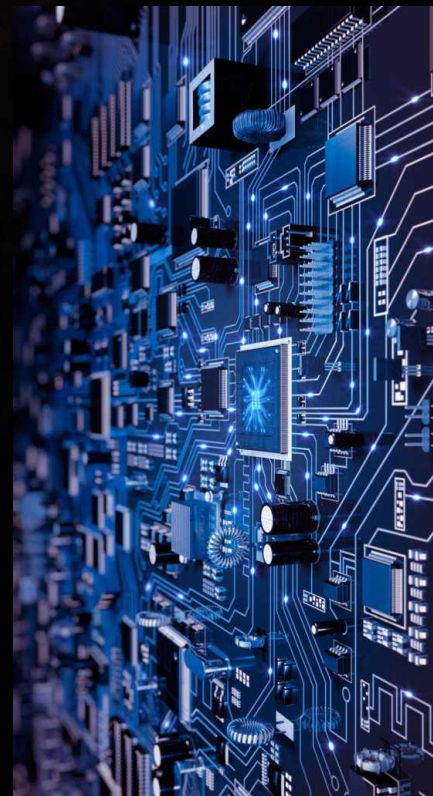

Scanny3D S.r.l. is a highly specialized company that deals with the design and production of reverse engineering systems, in particular 3D laser SCANNER, and the development of CAD-CAM software for industry.

TECHNOLOGY & KNOW-HOW

Our company has high skills in the design and implementation of reverse engineering systems and in the development of dedicated software, as well as in the creation of 3D graphics and animation systems, simulation and augmented reality systems, 3D tracking systems, development of graphic interfaces for the industrial automation and provision of consultancy services in various areas.

Our working methodology brings together more than fifteen years of knowledge and experience in the 3D industry with the highest quality standards. We invest heavily in the R&D to guarantee our customers the best quality and the most innovative techniques to support their work.

We work to exceed the expectations of our customers distributed all over the world, customizing our products according to their needs and offering dedicated assistance.

CUSTOMER CARE

Our only priority is to satisfy the customer who is looking for innovative and customized solutions. We want to be part of the solution to the problems associated with optimizing the work of industrial and medical technicians. This is why we are strongly committed to continuous improvement and investment in innovative and cutting-edge technologies.

HEALTH AND SOCIAL COMMITMENT

We are committed to successfully creating a fair and inclusive work environment in which each employee's contribution is enhanced. We promote diversity and meritocracy through internal promotion, training and development.

For many years, our company has contributed, with some of its products dedicated to the medical sector, to the search for new health solutions. Our products, designed and developed entirely in-house, use an absolutely harmless laser technology for humans.

COMPANY DEPARTMENTS

- R&D
- Production
- Quality check
- Sales office
- Technical assistance
- Communication

MISSION & STRATEGY

In Scanny3D we care about the challenges of industrial technology. Our commitment takes the form of 2 benefits for our customers:

INNOVATION:

the development of advanced and cutting-edge technologies.

Since our launch in 2004, the technological innovation and the research have always had a central role for us, allowing us to offer increasingly versatile and cutting-edge products, able to meet the specific needs of customers. We specialize in various industries, from medical to mechanical and last but not least in fashion. Our mission is to develop and offer innovative solutions with high technological content, and our R&D always looks at new technologies thanks to specialized staff with decades of experience.

CUSTOMIZATION:

custom-made products. Our strength lies in the ability to customize the software and to develop custom-made hardware solutions to satisfy the specific requests and customers' needs and to provide extremely reliable and accurate 3D scanning devices, very compact, easy to use and that do not require maintenance by the end user.

WHAT IDENTIFIES US ON THE MARKET?

The experience and professionalism, which have always distinguished our company, today gives life to a company that focuses on innovation and flexibility. We are convinced that we must be guided in everything by product quality and customization, in order to offer excellent performance.

OUR TEAM

All the results would not have been possible without the commitment of the best team of professionals and highly specialized technicians.

OUR HISTORY

Scanny3D was born in 2004 in the Marche region by the founder **Tonino Ciucci**, programmer and electronic designer, with decades of experience in software development and in the design of CAD-CAM systems. Together with his team of professionals Ciucci has developed research methodologies and technological innovation that have met with great success in various fields of the Italian and foreign market. Today Scanny3D is a solid reality in the technological avant-garde sector: we have been working for over 15 years to play a fundamental role in the service of industry and medicine, and we are able to respond to the demands of local and international markets through a widespread presence on the web and a thorough knowledge of the regulations of the countries of our customers.

Tonino Ciucci

1999

Foundation of the company GEAWARE to design and build CAD-CAM software and 3D graphics.

2003

Development of the first 3D laser scanner prototype and creation of the first software release for scanner management and 3D modeling.

2004

SCANNY3D

Foundation of Scanny3d s.r.l. and acquisition of rights on the use of patents for the production of the first series of 3D laser scanners.

2008

Demo room opening in the city of Monte Urano (FM) and expansion of the technical staff.

2011

Transfer to the operational headquarters and opening of the new demo room in the city of Rapagnano (FM). Expansion of its staff.

We are committed to improving relations with our main reseller partners, to whom we require the highest quality and flexibility to offer our customers better services. This is how we want to build our success for the benefit of employees, customers and partners.

The results we have achieved in recent years are not goals for us: they are indicators of the value we bring to the companies we work for, and they represent a compass for future choices and for making investments in line with the desire to make a significant contribution to technological research.

Our future invites us to always improve what we do, we must understand how the world of technology evolves in the service of industry and medicine, and by doing our job well we have the opportunity to grow and help an increasing number of companies.

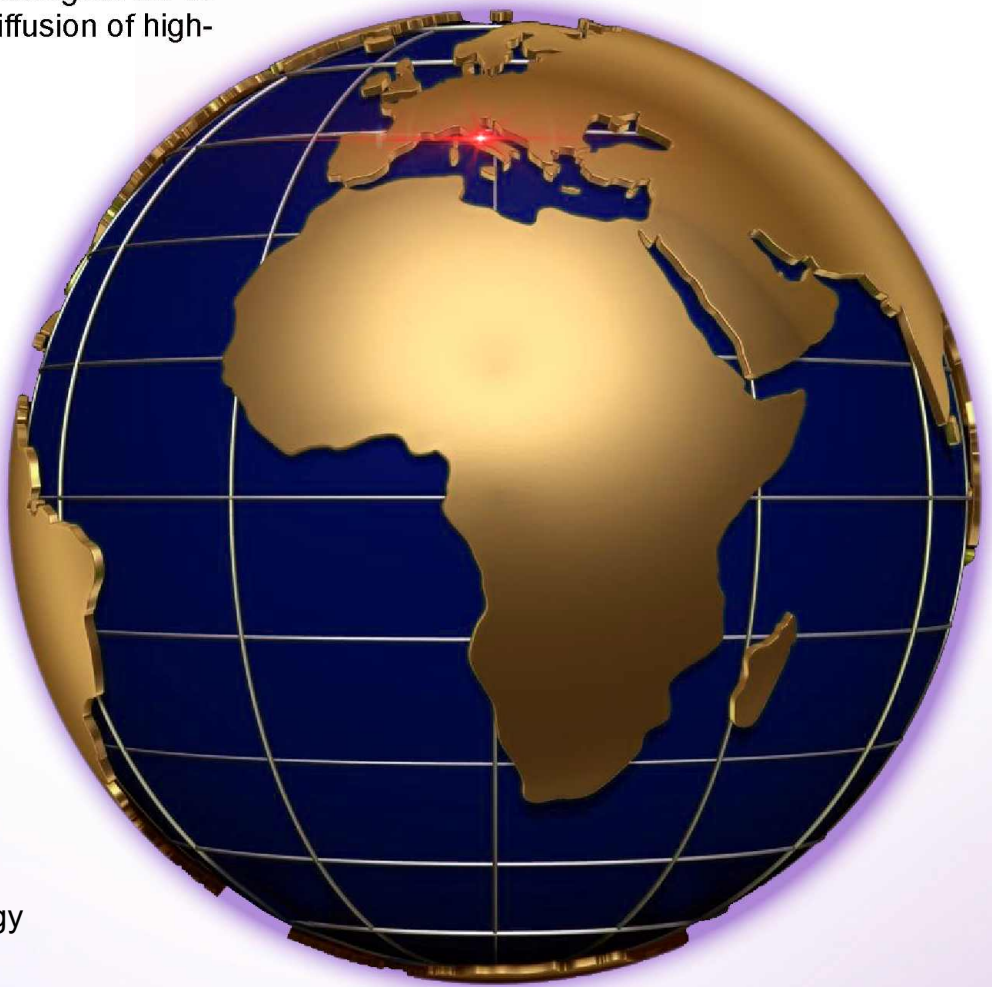

OUR PRESENCE IN THE WORLD

Internationality is a feature that has distinguished us since 2004. Our guiding light is the diffusion of high-level solutions all over the world.

Our products are 100% "Made in Italy", designed and developed totally in Italy and actually distributed worldwide by our direct sellers and also thanks to a widespread network of professional sales partners.

Over the past few years, Scanny3D has established a significant presence in some countries in South America and Asia, and is planting the seeds for a solid future development.

MAIN APPLICATIONS

The characteristics of our products allow the application of the technology developed in multiple sectors, including:

- Precision mechanics
- Packaging /bottling
- Footwear
- Engraving
- Fashion & Design
- Archeology
- Medical
- E-commerce

MAIN ACTIVITIES

- Reverse engineering systems (3D scanner)
- Quality control (2D and 3D)
- Rapid prototyping support
- Computer graphics modeling
- Automatic creation of 3D web catalogs for e-commerce
- Software development dedicated to the CAD-CAM sector
- Development of 3D graphics and animation systems
- Graphic simulation systems and augmented reality
- 3D tracking systems with 6 degrees of freedom
- Graphic interfaces for industrial automation
- Consultancy in the CAD-CAM sector
- CAD-CAM systems
- Vision systems

TRAINING

We are committed to training and growing our customers, we organize frequent technical conferences, training activities and meetings to present the latest trends and news of our company.

OUR BRANDS

Spheror[®]

FootFlash[®] 3D

PackSim
Advanced simulator for packaging & bottling

STEEL TEST
Steel RIB measurement advanced software

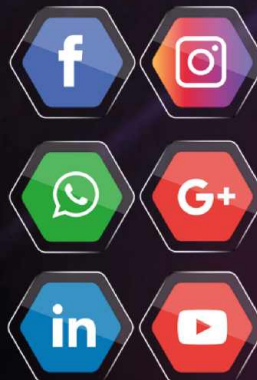

PodoFlash[®] 2.0
Electronic Video Podoscope

SCANBODY 3D
Fast volumetric analysis

COMMUNICATION

We consider communication with our customers, collaborators and partners very important, for this reason we often use specialized magazines and sector fairs to present the latest news on our products. Our commitment on social networks is also constant in order to update customers and receive important feedback from them.
